## SMALL ENERGY EFFICIENCY GROUP (SEEG) PROGRAMME IN VIET NAM

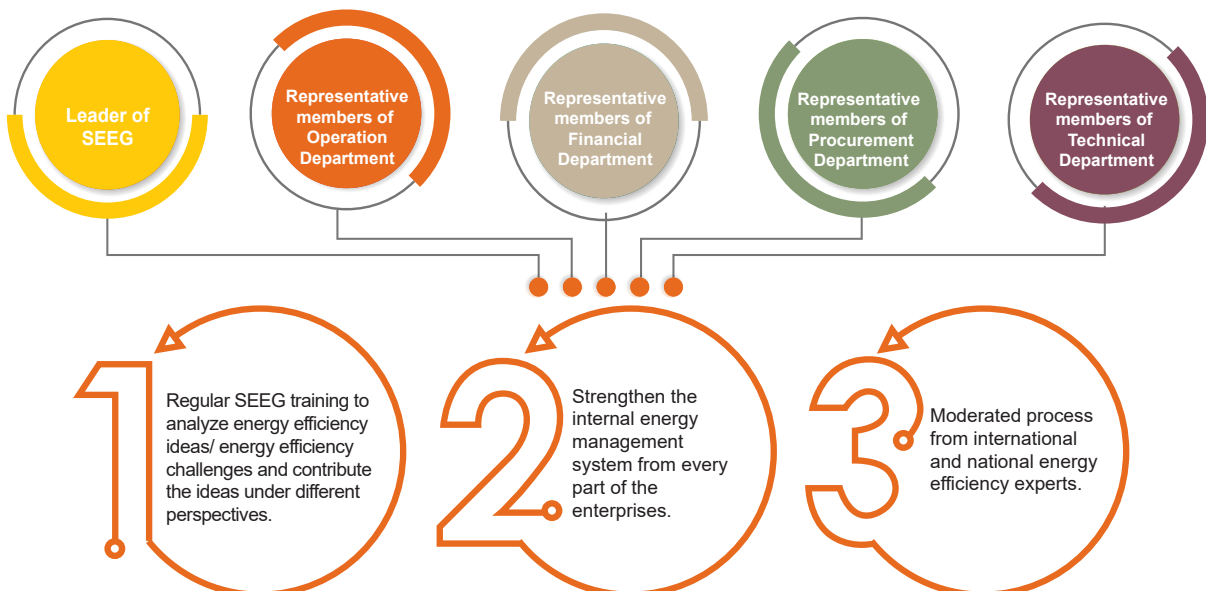

The SEEG programme provides support to Designated Energy Users (DEUs) in Viet Nam by training and improving competency of the SEEG within each enterprise so they could effectively identify energy-saving solutions. In addition, the programme also guides SEEGs to establish a simple and effective energy management system in order to improve their energy performance within their company.

The programme is organized by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH and Ministry of Industry and Trade (MOIT), with support of Federal Ministry of Economic Cooperation and Development (BMZ).

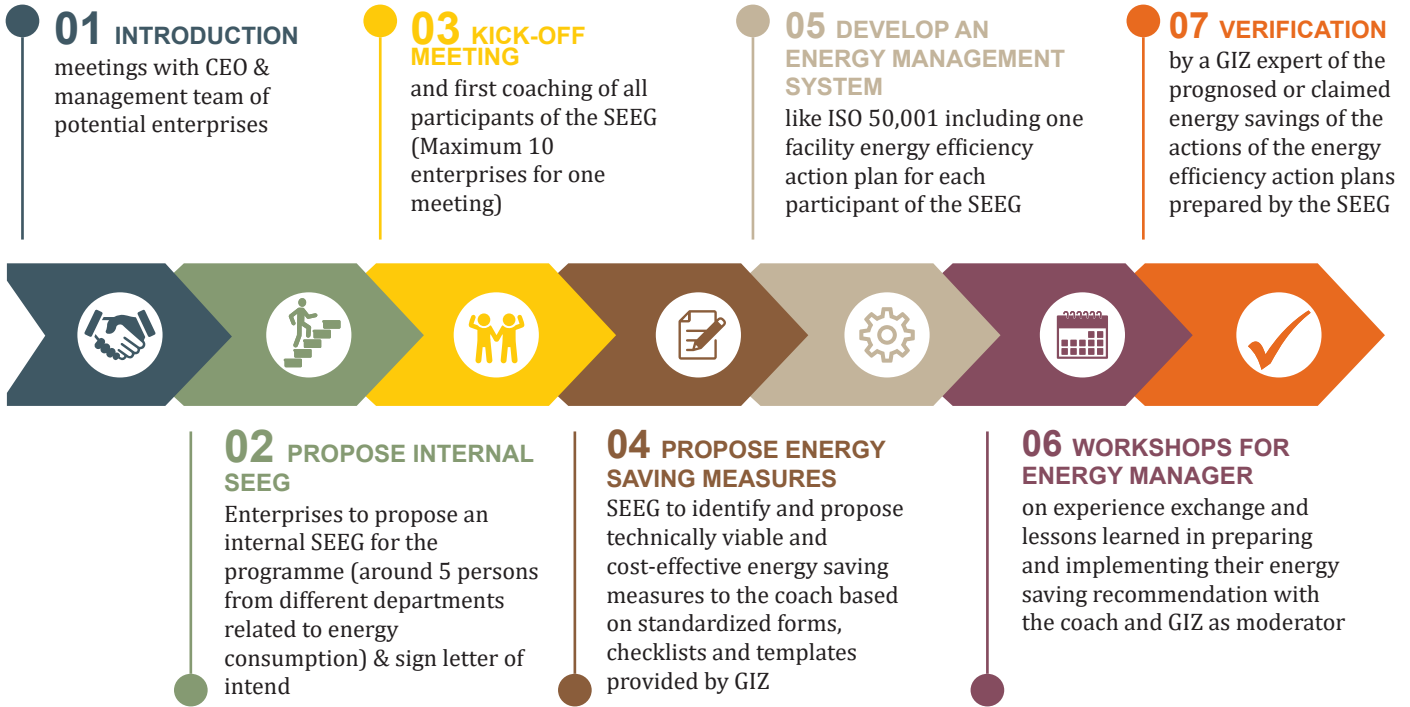

### Objectives of SEEG

- **To encourage** enterprise team members to identify their own cost-effective energy saving measures by effective workplace cooperation
- **To engage and learn** from a competent, experienced and licensed energy auditor as a coach to support the members of the SEEG on how to appraise energy efficiency measures and to review SEEG energy saving recommendations
- **To support** in setting up an efficient system to appraise the technical viability and cost-effectiveness of identified measures
- **To improve** enterprise energy efficiency and comply with the requirement of Viet Nam's energy efficiency law

### Members of SEEG within each enterprise

## Implementation Procedure

## GIZ offer for the enterprise

- Free coaching for the SEEG
- Free training of energy management system
- Continuous support by local energy efficiency experts

- Experience exchanges and lessons learned from best practices
- International experience in implementation of energy efficiency measures
- Free digital energy management system for best saving enterprise in the programme
